VPort 461A Series

Superior video performance, 1-channel H.264/MJPEG industrial video encoders

Features and Benefits

- Supports up to 4 video streams simultaneously for H.264 and MJPEG
- Up to Full D1 resolution (720 x 480) @ 90 fps for 3 video streams with legacy analog video images
- Video latency under 200 ms
- 2 Ethernet ports for cascading or Ethernet port redundancy
- DynaStream™ for optimized network efficiency
- ONVIF support for standardization and interoperability
- Local storage capability with SD card slot
- Industrial design with -40 to 75°C operating temperature range

Certifications

CE FC c(UL)us LISTED NEMA TS2

Introduction

The VPort 461A 1-channel industrial video encoder has a H.264 video compression algorithm that helps provide the best video quality on the market, but with a smaller bandwidth requirement than other video compression standards. In addition, to meet various video stream requirements, the VPort 461A can provide up to 4 video streams simultaneously using H.264 and MJPEG compression formats. Video streams can be used for different purposes, such as viewing, recording, and analysis. In addition, the rugged industrial design, which includes a -40 to 75°C operating temperature and industrial certifications, makes the VPort 461A suitable for harsh environments.

The VPort 461A is equipped with Moxa's innovative DynaStream™ technology, which allows users to change the video frame rate automatically. With DynaStream™, users can control their network bandwidth budget and simplify network system management. The CBR Pro™ function helps to guarantee the lowest packet loss under limited bandwidth transmissions to ensure that images will not exhibit the mosaic effect.

Specifications

Memory

SD Slot	SDXC

Input/Output Interface

Digital Input Channels	2
Digital Inputs	+13 to +30 V for state 1 -30 to +1 V for state 0 Max. input current: 8 mA
Relay Channels	2
Contact Current Rating	Resistive load: 1 A @ 24 VDC
Connector	Terminal block

Ethernet Interface
